

FOOD WASTE MANAGEMENT FOR THE FOOD SERVICE INDUSTRY

Soilutions 
FOOD WASTE MANAGEMENT

THE CURRENT STORY

1. Food represents 14.5% of the waste stream in America. That's about 20 pounds of food per month per person wasted. Meanwhile, here in New Mexico, nearly 40,000 people seek food assistance every week.

2. When food is disposed in a landfill it becomes a significant source of methane – a potent greenhouse gas with 21 times the global warming potential of carbon dioxide.

3. Landfills consume land and cost taxpayers millions to build and maintain. What's more, they have to be monitored for eternity.

4. Meanwhile our desert soils are hungry for that nutrient-rich organic material wasting away in the landfill!

LET US HELP

1. We provide you with the tools to divert food from your waste stream.

2. We pick up your food waste and deliver it to the Soilutions Compost Facility, where we turn it into our compost products.

3. Soilutions' compost products go back to our local farmers and gardeners to help them feed our community.

4. You, your customers and your employees are happy knowing that your business is doing its part to improve our environment.

WHAT WE DO

Soilutions' Food Waste Management division provides economical and efficient organic waste collection services for food service and processing facilities in central New Mexico.

We help you make a smooth transition from your traditional waste disposal practices to a “green” recycling program with referrals, advice, and a general expertise of local area recycling. We follow up with on-site monitoring, supplementary consultation, timely contamination reports, and data you can use to demonstrate the benefits of your food waste recycling program.

 **Visit soilutions.net for our fee schedule and service tiers.**

HOW IT WORKS

We meet with you to assess your business' waste stream and suggest the service tier best suited to your needs.

We help you train your staff to separate your waste at the source in order to keep contaminants out of the food waste.

We site wheeled and lidded 64 gallon carts for collecting food waste at your facility. The number of carts issued may vary until a consistent volume and pick up schedule can be established.

We exchange your full carts for empty ones. Whether access is curb side or commercial loading dock, collection container exchange is efficiently executed by our staff.

We haul your food waste to the Soilutions Compost Facility to be recycled into compost products.

We can provide constant feedback to ensure the continued economic success of your program. We will also help identify areas for improvement and reinforce staff training.

We provide you with monthly data that you can use to demonstrate your business' commitment to environmental responsibility.

If you think that your waste stream warrants a larger sized container than what we offer, give us a call and we can help you set up a program that meets your needs.

HOW YOU BENEFIT

- DEMONSTRATE LEADERSHIP IN SUSTAINABLE BUSINESS PRACTICES
- DECREASE YOUR CARBON FOOTPRINT
- LOWER FOOD PROCUREMENT COSTS
- REDIRECT SOLID WASTE COSTS
- ENHANCE YOUR MARKETABILITY
- SUPPORT YOUR COMMUNITY

WHAT MAKES US DIFFERENT

Soilutions' Food Waste Management division pioneered commercial scale food waste recycling in New Mexico. In operation since 2007, we have the only proven track record for this service in the state.

Our knowledgeable staff will help you determine what kind of package will best manage the volume of food waste that your business produces. We pride ourselves in being flexible and responsive to your needs – our goal is to make your organics recycling experience as pleasant and profitable as possible.

WE CAN SERVE

- Restaurants and Supermarkets
- Schools, Office Buildings and Hotels
- Food Processors and Distributors
- Hospitals, Colleges and Universities
- Private Communities
- Herdsmen, Stable Owners

WHO WE ARE

The *Food Waste Management* division is part of the Soilutions Inc. family. At heart we are organics recyclers, seeking to return the value of organic material (*yard waste, horse manure, and food waste*) to our depleted desert soils.

Soilutions Inc. offers a suite of services to meet this goal, including Organics diversion via *Food Waste Management*, Organics processing at our *Soilutions Compost Facility*, and Organics deployment via *Adaptive Terrain Systems*. It's about completing the cycle of life.

It's about the soil.
